

## AMENDMENTS TO CLAIMS

1. (Currently amended) A cleaning attachment for a screen-printing apparatus having a mounting assembly for removably coupling a squeegee to the apparatus, comprising:
  - a) a cylindrical roller;
  - b) mounting bracket attached to said roller, said bracket being adapted to mate with the squeegee mounting assembly of the screen-printing apparatus such that said cleaning attachment can be mounted to the screen-printing apparatus in place of a squeegee and adapted to be received be clamped to a printing station on a printing apparatus in place of a squeegee.
2. (Currently amended through dependency) A cleaning attachment according to claim 1, wherein said roller has a tacky surface.
3. (Currently amended through dependency) A cleaning attachment according to claim 1, wherein said roller is spring-biased within said mounting bracket to allow movement of said cylinder in a direction generally perpendicular to its axis.
4. (Currently amended through dependency) A cleaning attachment according to claim 1, further comprising:  
a U-shaped bracket having a center beam and legs extending from opposite ends therefrom, said roller being suspended between legs of the bracket.

5. (Currently amended through dependency) A cleaning attachment according to claim 4, wherein said center beam includes a portion for engaging a clamp.

6. (Currently amended through dependency) A cleaning attachment according to claim 4, wherein said legs of the bracket define a recess open at one end, and said bracket further includes a removable key to close the opposite end of said recess.

7. (Currently amended through dependency) A cleaning attachment according to claim 6, wherein said bracket includes a spring-biased protrusion extending into said recess.

8. (New) A cleaning attachment for a screen-printing apparatus having a mounting assembly for removably coupling a flood bar to the apparatus, comprising:  
a) a cylindrical roller;  
b) mounting bracket attached to said roller, said bracket being adapted to mate with the flood bar mounting assembly of the screen-printing apparatus such that said cleaning attachment can be mounted to the screen-printing apparatus in place of a flood bar.

9. (New) A cleaning attachment according to claim 8, wherein said roller has a tacky surface.

10. (New) A cleaning attachment according to claim 8, wherein said roller is spring-biased within said mounting bracket to allow movement of said cylinder in a direction generally perpendicular to its axis.

11. (New) A cleaning attachment according to claim 8, further comprising:  
a U-shaped bracket having a center beam and legs extending from opposite ends  
therefrom, said roller being suspended between legs of the bracket.

12. (New) A cleaning attachment according to claim 11, wherein said center  
beam includes a portion for engaging a clamp.

13. (New) A cleaning attachment according to claim 11, wherein said legs of  
the bracket define a recess open at one end, and said bracket further includes a  
removable key to close the opposite end of said recess.

14. (New) A cleaning attachment according to claim 13, wherein said bracket  
includes a spring-biased protrusion extending into said recess.
